DETAILED ACTION

Allowable Subject Matter

1. Claims 13, 16, 19, and 22 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests a semiconductor device which uses a gate insulator containing the specified nitrogen and fluorine concentrations in order to increase transistor reliability.
3. Aronowitz et al. (USPN 6,033,998) discloses a gate dielectric with a nitrogen concentration. However this concentration is part of an oxynitride compound without any mention of fluorine and thus does not teach the applicant's invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
